B.Tech Mechanical Engineer
APJ AbdulKalam University of Technology
2016 - 2020

Class 12
Indian School ,Bahrain
2015 - 2016

EXPERTISE

- React JS
- Angular
- HTML & CSS
- JavaScript & Typescript
- Git
- Bootstrap
- MongoDB
- Node Js
- Express Js
- JWT
- MVC Architecture
- multer
- SCSS
- Postman

ABOUT ME

MEARN Stack Developer based in Kannur,Kerala. Curious to learn more about developing scalable distributed systems, loves problem solving and cares about writing readable as well as maintainable code

ADDITIONAL QUALIFICATIONS

MEARN Stack Intern
Luminar TechnoLab I Kochi Dec 2022 - May 2023

I gained valuable full-stack web development experience as a MEAN Stack Intern at Luminar Technolab, working on designing, developing, testing, and deploying web applications using MongoDB, Express.js, Angular, and Node.js.

Revit MEP and AutoCad
CADD Center I Payyanur Dec 2020 - March 2021

I completed a Revit MEP course from CADD Center, where I gained hands-on experience in creating MEP systems and construction documentation using Revit MEP software.

PROJECTS

HOMEROCKS - Italian Marble Showroom Website
Technologies Used - (Angular,MongoDB,Nodejs,Express,MVC)

Developed an Italian marble showroom website using Angular, MongoDB, Node.js, and Express, following the MVC architecture. Designed responsive UI components with add to cart and add to wishlist features. Demonstrated proficiency in full-stack web development, Angular, MongoDB, Node.js, and MVC architecture.

Live Demo - <https://homerocks.netlify.app/>

Stop and Shop - Ecommerce

Technologies Used - (Angular,MongoDB,Nodejs,Express,MVC)

Developed an e-commerce website with Angular, MongoDB, Node.js, and Express, following the MVC architecture. Designed responsive UI components, implemented add to cart and add to wishlist features. Proficient in full-stack web development, Angular, MongoDB, Node.js, Express, and MVC architecture.

Live Demo - <https://stopandshopv1.netlify.app/products>

SOFT SKILLS

- Excellent Written and Verbal Communication
- Time Management
- Organising
- Creativity
- Adaptability
- Problem Solving
- Content Writing

Bank App

Technologies Used – (Angular,MongoDB,Nodejs,Express,JWT)

Developed a bank app using Angular, MongoDB, Node.js, Express, and JWT authentication. Implemented secure banking operations such as account management, fund transfers, and transaction history. Demonstrated expertise in full-stack web development, Angular, MongoDB, Node.js, Express, and JWT, creating a user-friendly and secure banking application.

Repo Link – <https://github.com/musthafaak56/bankApp.git>

Contact Management System

Technologies Used – (Angular,CRUD operations)

Developed a Contact Management System using Angular as a personal project, enabling users to add, remove, update, and search contacts efficiently. This project improved my skills in full-stack web development and frontend design.

Live Demo – <https://contactappv1.netlify.app/>

Grocery App

Technologies Used – (Angular,CRUD operations)

Created grocery web app with Angular, CRUD operations, JSON data storage, and responsive UI design. Demonstrated proficiency in frontend development and UI/UX principles.

Live Demo – <https://groceryappv1.netlify.app/>

Restaurant Listing

Technologies Used – (React,API fetching)

Developed a restaurant listing project using React and Fetch API to retrieve data from a backend server. Created responsive UI components and ensured a smooth user experience. Demonstrated proficiency in React and Fetch API.

Employee Management System

Technologies Used – (React,MongoDB,Nodejs,Express,Multer)

Developed an employee management system using React, MongoDB, Node.js, Express, and Multer. Created intuitive UI components, integrated file upload functionality, and implemented CRUD operations. Demonstrated proficiency in full-stack web development and expertise in React, MongoDB, Node.js, Express, and Multer.
